COVID-19’s Impact on The Arts
Research & Tracking Update: September 14, 2020

The coronavirus continues its devastating impact on America’s arts sector. Since the first U.S. case was reported in January 2020, cancellations have taken place at virtually every arts organization in the country and artists/creative workers are among the most severely affected segment of the nation’s workforce. Americans for the Arts leads four national studies tracking the human and financial impacts of the COVID-19 crisis on the arts.

1. Impact on Nonprofit Arts and Cultural Sector
Nationally, financial losses to nonprofit arts and cultural organizations are an estimated $13.1 billion, to date. 96% of organizations have cancelled events—a loss of 355 million admissions and $11.2 billion in audience spending at local businesses (e.g., restaurants, lodging, retail, parking). The total economic impact of organizational and audience-spending losses is $4.2 billion in lost government revenue and 725,000 jobs no longer being supported. Findings are based on 17,982 survey responses. (Survey, Dashboard.)

- 10% of organizations never closed. 15% have already re-opened. 22% plan to open in 2020, and 6% plan to open in 2021. 48% have no target date for re-opening.
- 10% of organizations are “not confident” that they will survive the pandemic (a potential loss of 12,000 organizations).
- 29% laid off or furloughed staff.
- 62% make their cultural product available online or through social media.
- 66% using art to raise community spirits and morale during social distancing/quarantine.

2. Impact on Artist/Creative Workers
Artists/creatives are among the most severely affected workers by the pandemic. 63% have become fully unemployed. They expect to lose an average of $22,000 each in creativity-based income in 2020 ($50.6 billion, nationally). Findings are based on 24,996 survey responses. (Survey, Dashboard.)

- 95% report loss of income.
- 79% experienced a decrease in creative work that generated income (62% “drastic decrease”).
- 67% are unable to access the supplies, resources, spaces, or people necessary for creative work.
- 78% have no post-pandemic financial recovery plan.
- Black, Indigenous, and artists of color have higher rates of unemployment than white artists due to the pandemic (69% vs. 60%). They also expect to lose a larger percentage of their 2020 income (61% vs. 56%).
- Top 3 Needs for Artists: unemployment insurance, food/housing assistance, forgivable business loans.

3. COVID-19 and Social Distancing: Impact of Arts and Other Activities on Mental Health
This ongoing study demonstrates that the arts provide mental health benefits to the public—even during the pandemic—combating the ill effects of isolation and loneliness associated with COVID-19. Preliminary findings show that just 30 minutes of active arts activities daily lowers anxiety and depression and increases life satisfaction. Begun by University College London in the UK, the study has been extended to the U.S. in partnership with the University of Florida and Americans for the Arts. All are welcome to participate. (Survey)

4. CARES Act Arts Funding Tracker
On March 27, 2020, Congress passed the $2.3 trillion CARES Act to financially support small businesses, nonprofit organizations, and gig workers impacted by the COVID-19 pandemic. This Tracker measures the success of the arts sector in securing eight federal CARES Act relief funding programs. Results to date are based on 3,706 respondents. As of July, 9,917 nonprofit arts organizations received $1.8 billion in PPP loans. (Share your results)

- Payroll Protection Program (PPP): 81% success rate
- Emergency Injury Disaster Loan (EIDL): 45% success rate
- Pandemic Unemployment Assistance (PUA): 50% success rate
